PROFILE

Product-minded Full-Stack Developer with experience taking software features from concept to production. Strong focus on end-to-end problem solving, technical implementation, and building practical solutions that support real business needs. Comfortable working across different layers of an application while balancing functionality, maintainability, and performance.

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Supportseller | Nov 2024 – Present

- Develop and maintain a production SaaS platform across frontend, backend, database, and integrations.
- Build browser automation tooling with Puppeteer and Chrome Extension APIs.
- Own end-to-end feature development from API and database design through business logic and UI.
- Work across TypeScript, Node.js, React/Nuxt, PostgreSQL, Prisma, Redis, and Docker.
- Improve performance, reliability, and scalability of production workflows.

Front-End Developer Intern | PT. Metaverse Teknologi Digital | Feb 2024 – Apr 2024

- Contributed to software development tasks and gained practical web application experience.

Front-End Developer Intern | Nino911 | Nov 2023 – Feb 2024

- Contributed to software development and gained hands-on web application experience.
